

Please keep XM radio's traffic and weather stations on the air. I can only receive two english speaking radio stations at my home, and I purchased XM's services to fill the gap left by traditionally broadcast radio. I find that normal radio is increasingly filled with commercials and vulgar monologues by radio ?personalities?. Even the "local" station with its tower located in my community, actually originates from the city 50 miles away - providing little or no local content.

Meanwhile, XM provides a high quality, virtually commercial-free product with an uninterrupted signal. Therefore, I urge you to reject NAB's petition 04-160 and allow XM to continue to be an industry leader.
